

## Demo launching at MSB

### gentleMACS™ Octo Dissociator with Heaters from Miltenyi Biotec

June 13, 2023 | 12:00PM to 1:00PM

Room 7231, Medical Sciences Building (onsite and virtual)

Registration: <https://attendee.gotowebinar.com/register/1450879691059065184>

Miltenyi is excited to announce a live demonstration of the GentleMACS Octo with Heaters Tissue Dissociator. The GentleMACS Octo with Heaters is an automated tissue dissociator that allows for gentle and efficient dissociation/homogenization of various types of tissue samples in a fully automatic and consistent manner.

This powerful platform enables researchers to obtain high-quality single-cell suspensions for downstream applications such as flow cytometry, cell culture, and other assays. The GentleMACS Octo with Heaters Tissue Dissociator offers reliable and reproducible results with minimal hands-on time, saving researchers time and effort in their experiments.

During the live demonstration, attendees can witness the GentleMACS Octo and Heaters Tissue Dissociator in action and see how easily they can handle various tissue samples. Our team of experts will also be available to answer any questions and provide guidance on the best practices for using these tools in your research.

**The dissociator will also be left at flow core until June 30<sup>th</sup>**, for people to have maximum flexibility preparing samples for a demo trial.

**If you are interested in trying your tissue sample, please contact with Richard for arranging demo consumables/reagents before June 13<sup>th</sup>:**

**Richard Yao. M.Sc.**

Technical Sales Consultant (Ontario)
